Our mission and vision is to create a community of people who want to raise their children wisely, respect their integrity, and strengthen their sense of value, so that in the future they become a happy and internally integrated people.

Mindfulness and creative workshops project

Polish speaking children had an opportunity to attend our **“mindfulness and creative workshops”**, based in three towns across Warwickshire: namely Coventry, Leamington Spa, and Nuneaton. They had the opportunity to attend classes in their native language. This was very important for their parents in consolidating the childrens' experience. Children had time and space to learn: how to be mindful and attentive, creative, and how to discover their talents and potential. They had the opportunity to meet the world of our emotions and develop greater emotionally intelligence in our workshop setting.

Parenting skills workshops project

Polish-speaking parents had the opportunity to attend “**parenting skills workshops**”, also in the same locations indicated above. The parents participated in two different workshops, both covering the Child-Parent relationship. The first covered how the mother's emotional absence can affect the development of the child and therefore, conversely, how to strengthen the child's self-esteem. The second was about communication and acceptance of feelings within the child, from a more empathic point of view upon the parent.
